In the Event of a Major Disaster

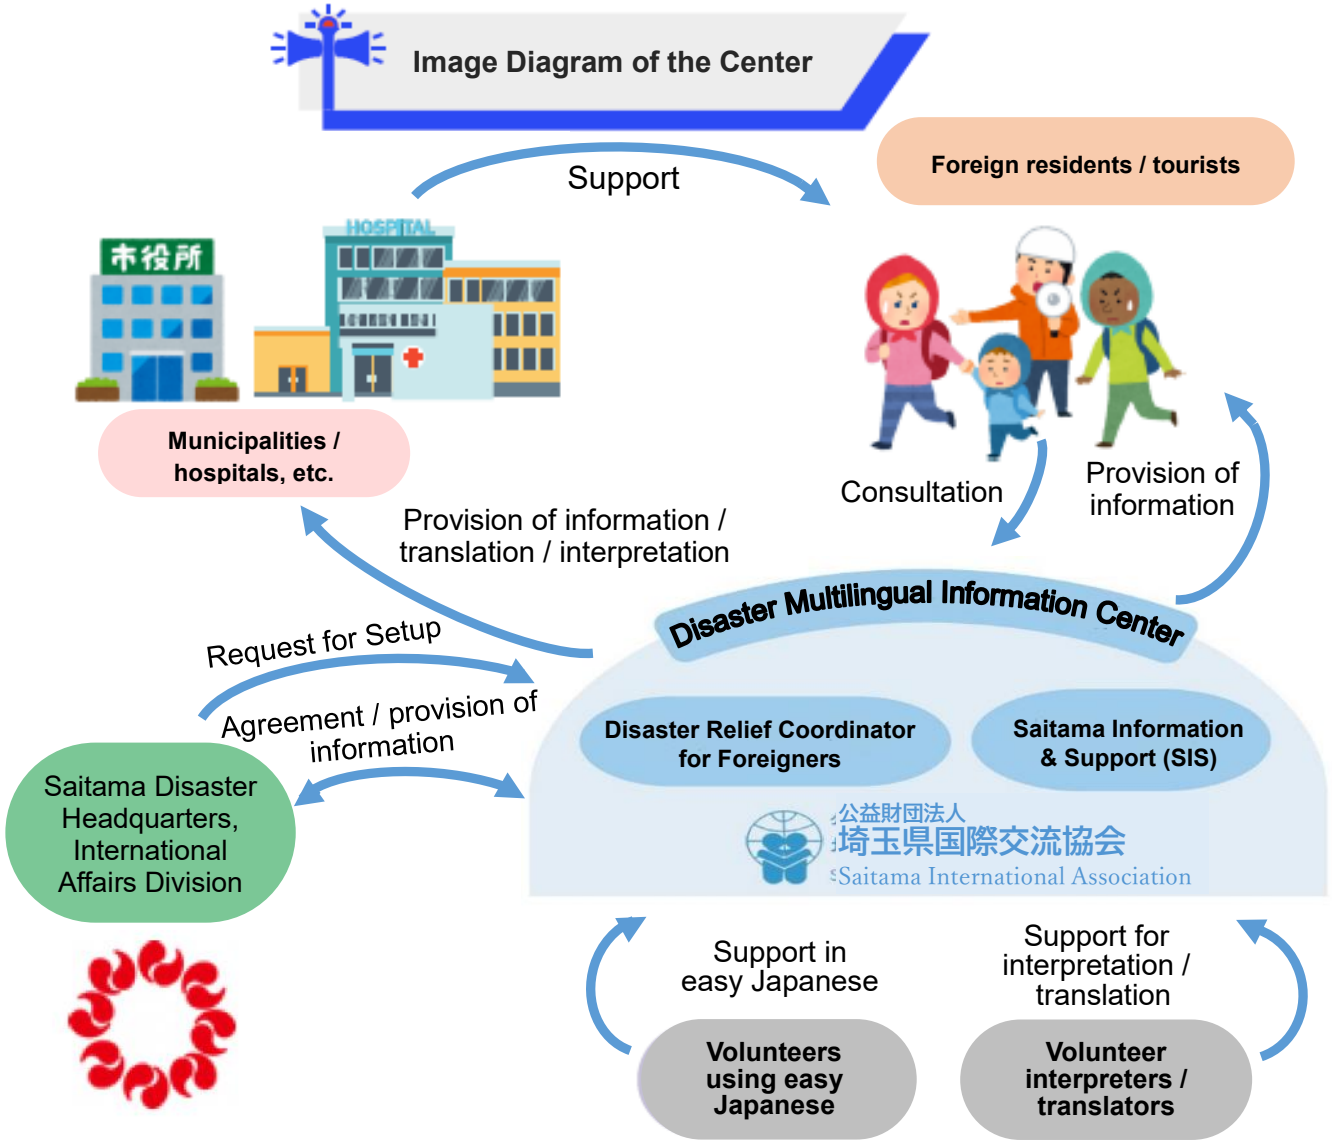
When a major disaster occurs in Saitama Prefecture and multilingual support for foreigners is required, Saitama International Association will open a "Disaster Multilingual Information Center" at the request of Saitama Prefecture. This Center provides information to help foreign residents and tourists to evacuate and live with peace of mind after a major disaster such as an earthquake or typhoon.

Opening of this Center will be announced on its website, social media, and so on.

Disaster Multilingual Information Center to be set up in the event of a disaster

"Disaster Multilingual Information Center" will convey information necessary for evacuation and evacuation life to foreigners in various languages, including English, Chinese, Korean, and Spanish.

There are quite a few foreign residents who do not understand Japanese and are in trouble in times of disaster. This Center plays an important role in supporting such people so that they can live in evacuation shelters with peace of mind.



When the staff of Disaster Multilingual Information Center cannot handle the situation, request for help by volunteers will be called.

Please see the website 'Saitama International Association' below for details.
